"I would like to sound the praise Hood's Sarsaparilla over the entire universe," writes Mrs. Longenecker of Un

School Journal, October 1st, 1802. (Extract from the School Journal, October 1, 1892.)

"It is a mistake to suppose that private schools are not efficient; the teachers are, in most cases, college graduates; the teachers' agencies assert that no one is so exacting as the private school principal in search of a teacher.

"In the private school, classification plays a small part and teaching a large part; a pupil is taken to be advanced irrespective of his class. The constant attempt is to create interest, and to put on the pupil himself, as much as possible, the responsibility of his own development. Freedom of thought, and, as much as possible, of action is encouraged."
